

Remove the template lines before sending the original.

Please send a JPG with template lines too (not high resolution). If there is pressure, follow the lines exactly.

Printed in full (100%) PMS colours. Choose the right color, not your own colors. No grids. With fully colored paper, there may be a small white line between the clichés.

Size of the paper: 90 x 201 mm, the wings are approx. 30 mm. Best pressure surface approx. 20 x 20 mm in the middle of the paper strip.

*The first print (the logotype) is placed at the top next to the top line, then you have the same distance between all prints so that the last print is just outside the template. Dashed red marking shows the approximate size of 1 piece of paper. Before you send the finished original, change the typeface (font) to vectorized (text contours). See page 2 of the PDF file for installation help.*
